## Education

**SAINT LOUIS UNIVERSITY** — Baguio City, Benguet
Bachelor of Science in Computer Science — June 2024 - Present
Dean's Lister

**HONORATO C. PEREZ SR. MEMORIAL SCIENCE HIGH SCHOOL** — Cabanatuan City, Nueva Ecija
With High Honors — 2017 - 2023

## Projects

**RXELLENCE: HEALTHCARE MANAGEMENT & PRESCRIPTION SYSTEM** — Baguio City
**Project Lead & Full-Stack Developer** — Oct 2026 – Dec 2026

- Led a development team to deliver a highly performant, lightweight application
- Directed end-to-end delivery of a comprehensive healthcare management platform, architecting the Entity-Relationship (ER) diagram, database schema, and User Interface (UI).
- Engineered the full-stack Doctor Module utilizing Vanilla PHP, Node.js, and Express.js to process auto-generated patient credentials, secure profiles, and interactive prescription staging.
- Integrated Chart.js dynamic data visualization to construct an analytics dashboard, delivering actionable insights on top diagnoses and quarterly prescription trends.

**NAVI-NOW: SMART SHUTTLE RESERVATION SYSTEM** — Baguio City
**Project Lead & Full-Stack Developer** — Sept 2026 – Dec 2026

- Guided initial conceptualization to deployment of a web-based shuttle management platform, modernizing commuter travel with real-time seat availability and digital booking.
- Engineered the full-stack Passenger Module, implementing dynamic scheduling interfaces, secure payment gateways, and automated QR-code ticketing.
- Designed foundational System Architecture and mapped complex user flows utilizing UML Activity Diagrams to ensure a logical, scalable structure.
- Authored comprehensive technical documentation, including Functional Requirements, Introduction, and Results sections to establish problem space and system efficacy.

**WHAT'S THE WORD: NETWORKED MULTIPLAYER WORD GAME** — Baguio City
**Core Java Developer** — March 2025 – June 2025

- Engineered a real-time multiplayer client-server word game utilizing Java Sockets and extensive multithreading to handle concurrent connections across dynamic 5-player lobbies.
- Developed the core word-generation engine with file I/O parsing and randomization algorithms to guarantee unique secret word selection for every round.
- Constructed an Administrator Dashboard with real-time search filtering and end-to-end CRUD capabilities to manage user databases, dynamic server controls, and live lobby settings.

**CONTEXT-FREE GRAMMAR-BASED MACHINE TRANSLATION: ILOKANO TO ENGLISH** — Baguio City
**NLP Software Engineer & Lead Researcher** — Feb 2025 – May 2025

- Engineered a Rule-Based Machine Translation (RBMT) system leveraging custom Context-Free Grammar (CFG) models and Part-of-Speech (POS) tagging to translate Ilokano phrases.
- Developed an enclitic processing engine to accurately parse and translate complex morphological variations, including adverbial, pronoun, and proper noun markers.
- Programmed an automated BLEU (Bilingual Evaluation Understudy) scoring metric from scratch, validating an outstanding 0.9416 average score indicating high-quality translation.
- Authored core scientific documentation, translating raw code metrics into digestible technical insights for a formal academic research paper.

## Skills & Interests

**Technical Skills:** Java, JavaScript, Python, PHP, Prolog, C, SQL (MySQL/MariaDB, Aiven SQL), HTML5/CSS3.
**Frameworks & Tools:** ReactJS, Node.js, Express.js, Flask, JavaFX, Chart.js, Pandas, Git/GitLab, Maven, Gradle.
**System Design & NLP:** ERD/UML Modeling, MVC Architecture, RBMT, Context-Free Grammar (CFG) parsing, POS Tagging.
**Interests:** Software Engineering, Full-Stack Development, Machine Learning, Data Analysis
